

Week 10 -

- This week, we went through the fundamentals of the internet. In our first class, we learned about IP addresses, firewalls, and different protocols like TCP, HTTP, and SMTP (which is used for emails). We also learned about internet layers. Furthermore, after reading the pdf on the Internet and basics, things got a little clearer about the protocols.
- Servers
- App client and gmail server
- Hardware communication, software communication
- Internet protocol address
- How servers work?
- Ping 8.8.8.8 - how much time it takes a response to come to me
- To stop ping press ctrl+c
- \$ route
- \$ ls-ltr
-
